PROFESSIONAL SUMMARY

A results-oriented Frontend Developer with nearly 5+ years of experience in designing, developing, and deploying modern web applications. Proven ability to lead technical decomposition, mentor frontend developers, and establish robust code quality standards. Expert in the React ecosystem, TypeScript, and architectural patterns like Feature-Sliced Design (FSD). Seeking to leverage my skills to build high-quality, impactful products in a challenging new role.

SKILLS

- Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3/SCSS, Sass
 - Frameworks & Libraries: React, Redux (Redux Toolkit), React Router, Node.js, Express, PrimeReact, Tailwind CSS, Webix, React Testing Library, Vitest
 - Tools & Technologies: Git, GitHub, Docker, Webpack, Vite, ESLint, Prettier, Husky, Figma, Yandex Tracker
 - APIs & Protocols: REST API, WebSocket, TCP/IP
 - Methodologies: Agile, Scrum, Code Review, TDD, CI/CD, Feature-Sliced Design (FSD)
 - Databases: PostgreSQL
 - Languages: English (Upper-Intermediate), Russian (Native)
-

PROFESSIONAL EXPERIENCE

Senior Frontend Developer | NTC "Mechatronica" | St. Petersburg
(<https://systeme.ru>)

January 2023 – Present

Leading the development of a new-generation SCADA system using a modern React SPA stack to replace a legacy Webix MPA solution, aiming to enhance performance and user experience for engineers and operators.

- Led the technical decomposition of business requirements into actionable tasks for a team of 3 frontend developers.
- Architected and implemented a Feature-Sliced Design (FSD) based application with PrimeReact, accelerating the development of standard interface modules by 40%.
- Established and enforced Code Quality practices by configuring ESLint, Prettier, and Husky pre-commit hooks; covered critical components with unit tests using Vitest, reducing bugs reaching QA by 20%.
- Engineered complex and critical UI components, including real-time data charts with WebSocket integration.
- Acted as a mentor and established a code review process to ensure high code quality and consistency.
- Played a key role in technical interviews and team formation for the new frontend initiative.

Frontend Developer | ITFrog LLC | St. Petersburg
(<https://itfrog.ru/>)

May 2020 – September 2022

Developed a corporate CRM system from the ground up to automate the sales department's workflow, replacing scattered Excel sheets with a unified, transparent tool.

- Designed the frontend architecture using React and Redux Toolkit, enabling efficient state management for complex data flows.
- Developed a reusable UI component library (buttons, inputs, modals), which accelerated new feature development by approximately 30%.
- Achieved a First Contentful Paint (FCP) of under 1.5 seconds through strategic code splitting, tree shaking, and lazy loading of components.
- Collaborated closely with the UI/UX designer to translate Figma mockups into pixel-perfect, responsive components with Tailwind CSS.
- Reduced manager data entry errors by 25% by implementing robust client-side validation and intuitive UX improvements, such as batch editing for deals.
